

Telephone OnHold Experience

TOTLCOM is just thrilled to offer telephone on-hold music and messages to our customers from The OnHold Experience . The OnHold Experience produces a custom script for your business that plays while your customer is on hold. The proper utilization of the telephone is critical as you interact with your customer base. It is the role of The OnHold Experience to transform hold time into an asset for your business.

The OnHold Experience will help your company communicate and interact with your client base in a professional and effective manner. Custom on hold messages enhance customer service, build image, cross promote products and services and drive web site traffic.

Think of the OnHold Experience as an audio newsletter than can change as often as you like. Your OnHold Experience will include full service, comprehensive production services from their Los Angeles based studio professionals. The OnHold Experience works with most leading phone systems.

The OnHold Experience is risk free. Try our 40-day free test drive today! Contact us.
