

Business Telephone System Leasing: CTAP (Current Technology Assurance Program)

TOTLCOM teams with GALC (Great America Leasing Corporation) to bring you CTAP (Current Technology Assurance Program). Telecommunications technology is advancing at a pace never before seen in the industry, increasing the need for programs that help protect your investment. CTAP enables you to install current technology without large up front costs, to upgrade to new technology without increasing monthly payments, and to ensure total protection of your communications infrastructure.

Technology provided today can be renewed, refreshed or replaced as required as emerging technologies become available and needed. CTAP is considered an operational expense as opposed to a capital investment which is attractive to the CFO's of business.

Ask us about CTAP (or CTAP Buy Back for your existing owned system). Contact us.
